

Texas Professional Licensure Disclosure | Certified Public Accountant (CPA)

Overview

DeVry University and its Keller Graduate School of Management are committed to providing students with accurate information to help students make informed decisions about their education.

The educational and non-educational prerequisites for Certified Public Accountant (CPA) licensure can vary significantly from state to state and U.S. territory. These variations encompass the number of accounting and business course hours, experience, exam success, background checks¹, and ethical compliance. Understanding these differences is key to determining a student's eligibility to sit for the Uniform CPA exam and apply for licensure in different jurisdictions. The U.S. Department of Veterans Affairs regulations mandate institutions to transparently disclose any additional non-educational requirements necessary to obtain the license or certification for which the program of education is designed to provide preparation.

¹Results of a background check may disqualify an individual from obtaining licensure. As such, it is your responsibility to determine if your circumstances pose any barriers.

Education Requirements

Hold a baccalaureate or higher degree from a board-recognized college or university in the United States, or an equivalent degree from another country as determined by board rule.

- 150 semester hours or quarter-hour equivalents of college credit must be completed.
- 27 semester hours or quarter-hour equivalents of upper-level accounting courses from an accredited college or university. Two semester hours of accounting or tax research and analysis are required as part of the coursework.
- 24 semester hours or quarter-hour equivalents of upper-level related business courses must be completed. Two semester hours of accounting or business communication are required as part of the coursework.

Experience Requirements

The current requirement is one year of full-time non-routine accounting work experience under the direct supervision of a licensed CPA.

The work experience can be obtained through full-time or part-time experience:

- Full time consists of 12 calendar months of full-time employment.

- Part time consists of at least 2,000 hours of employment over a period of not more than two consecutive years where 20 hours of work per week is performed on a continuous basis. Documentation is required.

Non-routine accounting involves attest services or professional accounting services or professional accounting work, and the use of independent judgment, applying entry level or higher professional accounting knowledge and skills to select, correct, organize, interpret, and present real-world data as accounting entries, reports, statements, and analyses extending over a diverse range of tax, accounting, assurance, and control situations.

Work experience must be gained under the supervision of a CPA who is responsible for supervising, evaluating, and reviewing your work. The supervising CPA must hold a current license or permit issued by this Board or by another state board of accountancy. Work experience forms should be submitted with the Application for Issuance of the CPA Certificate after you have passed the CPA Exam.

Ethics Requirements

- Taking an Oath of Office
- Taking a four-credit ethics course
- Completing the Texas Rules of Professional Conduct with a score of 85 percent or higher. This exam is open-book and emailed to you after passing the CPA Exam.

Other Requirements

- Pass all four sections of the CPA Exam with a score of at least 75 in each section within an 18-month window.
- Pass a background investigation.
- A social security number is required to apply for a CPA license in Texas.

DVU Licensure Programs

The following DVU programs meet the educational requirements for CPA licensure in the state of Texas:

- Master of Science in Accounting - Certified Public Accountant (CPA) Exam Preparation Emphasis
- Master of Accounting and Financial Management – Certified Public Accountant (CPA) Exam Preparation Emphasis

It is important to note that these determinations apply to individuals holding a bachelor's degree in accounting or a business degree with a focus on accounting or finance. DeVry's bachelor's degrees in accounting and business were used as a baseline for these determinations, and checking with your state board of accountancy is recommended to ensure that all specific educational requirements for licensure are satisfied.

CPA Review Courses

Credits obtained from CPA exam review courses cannot be used to fulfil the mandatory concentration in accounting coursework in the following states: FL, KS, NJ, NY, TX, and VT.

Accreditation

DeVry University is accredited by The Higher Learning Commission (HLC), www.hlcommission.org. The University's Keller Graduate School of Management is included in this accreditation.

Our Accounting Degrees are accredited by the Accreditation Council for Business Schools and Programs (ACBSP) www.acbsp.org. Please refer to the [academic catalog](#) for details.

Student Relocation

Students who intend to relocate should notify the DeVry University of their location change and review the professional licensure requirements of that state’s professional licensing board. Visit the [National Association of State Boards of Accountancy](#) to find the contact information, as well as a listing of statutes for the State Board of Accountancy in each of the 55 jurisdictions. For additional information about student relocation, please refer to the student relocation notice within the [academic catalog](#).

Other Accounting Related Programs

The programs listed below are not specifically designed to prepare students for licensure. However, they offer valuable knowledge and resources that can provide a foundation in accounting and business concepts as well as practical skills.

The undergraduate programs are classified as pre-licensure programs. For example, every state and territory require a minimum of 150 semester credits of specific coursework for CPA licensure eligibility. Generally, undergraduate programs do not provide enough credits to meet this requirement. Nevertheless, students can leverage the credits earned in these undergraduate programs toward the licensure requirements.

The Graduate Certificate in Accounting Certification Preparation program, with a Certified Public Accountant Exam Preparation option is designed to help students prepare to sit for the CPA exam by offering practical resources and focused exam preparation. Additionally, the program may offer a few extra credits in certain states to help students qualify for CPA licensure.

The remaining programs provide advanced knowledge and skills in accounting and finance to equip students for various non-licensure accounting and finance roles, such as financial analyst, management accountant, internal auditor, budget analyst, and financial manager.
